- (54) Title: BOTTLE COOLERS AND METHOD OF PROMOTING BOTTLED BEVERAGES

(57) Abstract: The present invention relates to bottle coolers and a method of promoting bottled beverage products by promoting bottle coolers made specifically for that bottled beverage product. The bottle cooler preferably comprises a container for containing ice that is adapted to have the beverage bottle positioned substantially therein, wherein regular ice cubes from standard ice dispensers can be stored and sealed within the space between the bottle and container, to help keep the beverage inside cool. The space is preferably substantially sealed by a cap which is adapted with an opening and a sealing member that extends over the neck of the bottle, wherein the bottle can be held in between the sealing member and one or more supporting surfaces extending substantially underneath the bottle. Other embodiments that fit particular bottles using refrigerants are contemplated.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
